SUBJECT: November 2009 SUMMARY OF TERRORIST AND
SIGNIFICANT SECURITY INCIDENTS

REFS: A) Algiers 01157
B) Algiers 00992

¶1. (SBU) INTRODUCTION: This cable is a summary of major security-related activities, terrorist threats, and incidents for Algeria during the month of November 2009. The information was obtained from open sources, news reports, and RSO police contacts. Press-based information should not be taken as exact or definitive but can be used to track countrywide patterns and trends. Reported activities are maintained in a master database utilized by the RSO in formulating guidelines for life safety and travel within Algeria. Please note that Algerian media frequently still refer to al-Qa'ida in the Islamic Maghreb (AQIM) by its previous name, the Salafist Group for Preaching and Combat (GSPC). End introduction.

¶2. (U) Terrorist-specific trends: During the month of November, Algerian security forces engaged in 17 conflicts with terrorist elements throughout the country. This resulted in eight deaths and 21 injuries (to include military and gendarmerie forces). Seventeen bombs, nine of which were defused, were reported in the month of November and resulted in a soldier's death and 18 serious injuries (eight military officers, five gendarmes, and five civilians).

¶3. (SBU) Suicide bombers successfully infiltrated Algiers in the month of November. On November 3, RSO Algiers was informed by local police contacts of the capture of a suicide bomber (the suspect was arrested on or about November 1). Police reported that the suspect had been wearing a suicide vest and had been tasered and captured just three miles from the American Embassy. Under interrogation, the suspect admitted to an accomplice -- a second suicide bomber who was still at large in the city. The second suspect Abdelkrim Arfiche (aka Abou Mouaad), was believed to have successfully fled the city soon after the planned attack was disrupted, despite a city-wide man hunt for his capture and arrest (ALGIERS REF B).
